

## High security palisade fence

### Description

High security Palisade fencing means that razor wire on the general or bent head, it can improve the security to the top level and offers the best there is in a high security fence, a durable versatile fence at a cost effective price.

Palisade is more secure than other fencing systems, so wherever security is a priority, Palisade is used. Steel palisade fencing is especially popular for schools, park and industrial sites because of its high damage resistance and the fact that it is so difficult to climb.

As palisade fencing manufacturer, HT-Fence supply both the W section and the D section style of palisade fencing, with the integrity of the palisade fence being maintained by the two horizontal rails that are used as standard in palisade fences up to three metres high. However, we can supply other heights of palisade fencing as your required.

### High security Palisade Fence Features

- ❖ Bolt-on Palisade fencing can be installed by semi-skilled staff as there is no welding on site.
- ❖ Bolt-on Palisade fencing is easily transported. The components are packed in bundles.
- ❖ Bolt-on Palisade fencing which has been hot-dip galvanized is not compromised by welding on site.
- ❖ Bolt-on Palisade fencing can be easily moved to another fence line.
- ❖ Razor wire on the head can provide highest level security protection
- ❖ HT-Fence Palisade fencing is modular. Sections can be replaced easily if damaged by vehicles, falling trees, etc.

### Palisade Fence Application

It is often used in villa, park, industrial plants, garden, isolated of road, school, station, residence community, etc.
