

Welded Wire Panel Fence/Peach post fence

Description

Peach post fence is a type of welded wire mesh which has V-shaped strengthen bending curves. It is made of high quality low carbon steel wire, galvanized wire. Then will be hot dipped galvanized, powder coated or pvc coated. It looks modern and attractive. Mainly used for security protection in construction site, residential building, sports field, warehouse, highway or airport service area, railway station, etc.

The height are available in a range of heights from 630 till 2430 mm.

The panels have vertical barbs of 30 mm that can be placed at the top or at the bottom.

The horizontal reinforcements of Bekafor Classic give the panels extra rigidity.

The popular wire diameter are 4.0mm and 5.0mm, mesh holes are $50 \times 100\text{mm}$, $50 \times 150\text{mm}$, $50 \times 200\text{mm}$, others are available.

Posts are manufactured from high quality galvanized steel plate, we have two kinds of advance peach post machine. One is for 50×70 peach post, another is for 70×100 peach post. This peach post fence system not need any bolts and clamps when installation. There are many hooks in order on the post. It is very easy to install and fashionable, strong and durable. Most important, The cost for this peach post fence system is cheaper than square / round post fence system. It is can be first choose.

3. Installation manner

1) The post popular buried under the ground 400mm and pouring concrete when installation them.

2) Welded flange base under the post, and use setscrews to install on the harded ground.

HT-Fence welded wire panel fence is manufactured from galvanised material, powder coated and pvc coated. The popular color is Green RAL 6005. If others color is required, we're easily able to provide this. All of our fence power from AKZONOBEL Company.
