

## Airport Fence

### Description

Airports and aviation buildings are sensitive areas that require perimeter fencing solutions that stand up to the high risk levels. There are also demands from a legislative and legal aspects that are often unique to aviation based environments.

Most airport fencing projects will demand a solution that excellent protect the airport area. We used 3D fence panel with concertina razor wire as a general type. It is a type of welded wire mesh which has V-shaped strengthen bending curves. It is made of high quality low carbon steel wire, galvanized wire. Then will be hot dipped galvanized, powder coated or pvc coated. It looks modern and attractive. Mainly used for security protection in construction site, residential building, sports field, warehouse, highway or airport service area, railway station, etc. The height are available in a range of heights from 2500 till 3000 mm. The popular wire diameter is 5.0mm, mesh holes are 50 × 100mm, others are available. The razor wire popular is diameter 500mm.

Posts are manufactured from steel tubular section with threaded inserts for fixing the steel mesh clips. Additional fixings are provided to accommodate stepping of panels where the fence is installed on a gradient.

The general post section are 60 × 60mm, others are available.

Concertina razor wire adopted galvanized material or electrophoresis razor wire (Patent product).

HT-Fence welded wire panel fence is manufactured from galvanised material, powder coated and pvc coated. The popular color is Green RAL 6005. If others color is required, we're easily able to provide this. All of our fence power from AKZONOBEL Company, paint from Nippon Company.

### Airport fence Features

- ❖ Attractive and cost effective solution.
- ❖ Panels have a high level of rigidity
